GeoPaveX is the modern approach to paving!

GeoPaveX is a trowel-finish, resin bound paving system that is available in a wide range of natural aggregates, recycled materials, marble and glass.

GeoPaveX provides a smooth, aesthetically pleasing, UV stable and hardwearing surface that is resistant to cracking.

The system can overlay existing surfaces such as asphalt, concrete and other stable substrates, it is ideal for urban revitalization.

THE GEOPAVEx TREE PIT

GeoPaveX Tree Pit packs provides the solution to problems associated with open tree pits and metal tree grilles such as litter and waste, trip hazards, weeds and vandalism.

Pervious GeoPaveX allows on average 10 Gal/Min/SF of water to pass through to the roots of the tree without the need for watering tubes. GeoPave creates a hard wearing, natural finish that compliments any environmental improvement scheme.

Features and Benefits:

- ✓ Aesthetically Pleasing
- ✓ Highly Durable
- ✓ Flexible
- ✓ No Loose Stones
- ✓ Restricts Growth of Weeds
- ✓ Solvent-Free
- ✓ Odorless
- ✓ Environmentally Friendly, Biomass-Based
- ✓ Resin Component
- ✓ Produces Stunning Surfaces
- ✓ Superb range of aggregate blends
- ✓ Anti-Skid Aggregates Available
- ✓ Perfect for harmony with existing environment
- ✓ Adaptable Curing Times
- ✓ Tree Pit Packs Available
- ✓ Standard and UV Resistant Versions Available

Uses Include:

Crosswalks
Driveways
Landscape Schemes
Footpaths
Heritage Sites
Garden Paths

Waste Water Management

GeoPaveX has been developed as a pervious system. GeoPave allows 10/ gal/min/SF of water to soak through the surface, helping to prevent the causes of flash flooding.

Low Impact Development methods designed to handle storm water runoff in a sustainable and cost effective way can be used in conjunction with GeoPave for an appealing solution to conventional systems.

Surfaces can be printed in herringbone, or offset brick patterns.

Aggregates such as flint, quartz, granite, marble and even recycled materials like glass and crushed ceramics can be used or mixed to enhance your design. Below are a few examples of the standard stock aggregates. and our selection is continually updated. Contact the Complete Streets USA for more information
